CERTIFICATE OF MAILING

I hereby certify that this paper is being deposited with the United States Postal Office with sufficient postage as first class mail in an envelope addressed to: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450 on August 4, 2004.

 Judith L. Goldberg

DECLARATION

Commissioner for Patents
 P.O. Box 1450
 Alexandria, VA 22202

Sir:

I, Mark Doty aver as follows:

1. I am over the age of twenty-one years and make these statements from my own personal knowledge.
2. I have received a Bachelors Degree in Chemical Engineering from the University of Minnesota in 1987 and a Doctor of Philosophy Degree in Chemistry from Iowa State University in 1995.
3. I have been employed by Baxter since 1995 and currently hold the position of Associate Director of Research.
4. I am a joint inventor on U.S. Patent Application Serial No. 10/021,692.
5. I have reviewed the claims of this application and I believe that the claimed invention was conceived prior to January 7, 2000 and I have diligently worked on this project since this time.
6. As evidence of this I have attached laboratory notebook pages with dates redacted. The laboratory notebook pages are not necessarily the earliest date of conception of

the claimed invention and do not represent the results of an exhaustive search for evidence of the earliest date of conception or reduction to practice.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further, I acknowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under §1001 of Title 18 of the United States Code and may jeopardize the validity of the application or any patent issuing thereon.

Date: August 4, 2004

Mark J. Doty

BOOK NO. 20744 - 39

Self Dispersion of Prednisolone - Lecithin

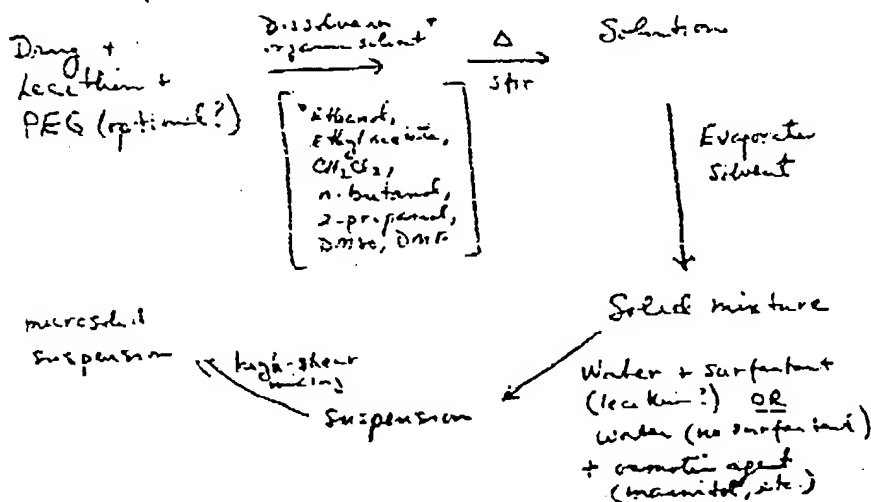

FORM 170

Notebook

Purpose:

Test the hypothesis that one can make microcapsules (or minimize particle size in a macro-suspension) by first preparing a solid dispersion of the drug in a matrix such as PEG (polyethylene glycol) and/or phosphatidylglycerol, phosphatidyl alcohol (or lecithin). The solid is then resuspended in an aqueous solvent (water + surfactant). Hopefully! high shear mixing (stirring? homogenization?) will cause breakdown of the solid to form microcapsules (or minimized homogenized drug) in suspension.

General procedure:

I will first attempt to prepare a 1% prednisolone suspension using a 5% (w/w) solid dispersion of drug + lecithin (or egg phosphatides). This solid will be dispersed in an aqueous medium (water + mannitol). Call this formulation FORMULATION 1.

BOOK NO. 20813 - 60

TITLE pH-precipitation of Lactz Acid Prior to Homogenization

Form Page No. — PDA or Protocol — Pre-330.41 — 340

Purpose: Note an idea. Use pH-induced ^{micro}precipitation of Intracmarole prior to homogenization to reduce ^{no} particle size. Use lactic acid to solubilize the drug. (See Chem. Pharm Bull, 46(8), 1333-1334 (1998)).

Lactz Acid → pH → Homogenization → Add → Stabilize → Store
+ Drug or other means change or other means or other mechanical means Surfactant(s)
